Profile

My Motivation: An information technology enthusiast with the belief that technology is everywhere and has revolutionized everything we do.

My Professional Mantra: Providing optimized and creative web designs timely to clients.

Strengths: Self-motivated, self-driven individual with the capacity to lead projects independently and work cordially in a team. Excellent communicator who thinks rationally and works in a structured and organized way. Timely guidance and critical feedback are always appreciated.

What I bring to your organization: A suite of tools includes but is not limited to HTML, CSS, JavaScript, Git, Python, and C++, with an attitude that learning never stops.
